

Roman Ivashkevych

FRONT-END
WEB DEVELOPER

Hard working and self motivated with a passion for life-long education and a commitment to building a brighter future with the web.

Profile

I'm a front end web developer who is drawn to optimization and automation. With previous experience in leading technical teams in telecommunications, I've learned to problem solve creatively and communicate effectively. There's nothing more valuable than productivity, and I want to use this mindset, along with my skills in web development to build applications that improve business operations and increase efficiency.
